ABOUT ME

I am a recently graduated mechatronics engineer, and programming technician that has concluded that he loves programming the most, I love tackling hard problems, and never give up, I plan to further specialize.

WORK EXPERIENCE

Generation Bootcamp

2022-2022

Created a personal portfolio to showcase some of my projects and skills

Acted as Scrum Master and project leader when developing an e commerce site

Learned both hard skills and soft skills required to be a successful full stack developer

Used JavaScript, HTML, CSS, Java, git and SQL

EDUCATION

Mechatronics engineer | CETI

2018-2022

Experimented with convolutional neural networks and object detection.

Developed various applications using Java, including double recursive algorithms such as n-queen problem and a sudoku solver using dancing links.

Used Python, Matlab and Java .

Programming Technician | Univa

2015-2018

Developed mobile applications using android studios and app inventor.

Used both structured and object oriented programming.

Used C++, C#, Visual Basic, ActionScript and SQL.
